

Tecnología Balanced Optics™, combinada con un reflector altamente sofisticado e a un LED di qualità, per un fascio di luce luminoso e regolabile.

Una gestione intelligente della sorgente energetica (Intelligent Energy Source Management, in attesa di brevetto), che bilancia l'alta luminosità con un uso efficace della fonte di energia.

La tecnologia LED allunga la durata delle batterie.

Haz de proyección que enfoca con sólo girar el cabezal.

La tecnología **Balanced Optics™**, combinando un reflector altamente perfeccionado con un diodo LED de calidad, para un haz de luz brillante y ajustable.

Administración inteligente de fuente de energía (con patente en trámite) proporciona equilibrio entre gran brillo y un uso de la potencia.

La tecnología LED aumenta la vida de la batería.

DURACELL®

NE PAS CONNECTER
UNOPIEDIMENT, CHARGER NI JETER AU
FEU. LA PILE PEUT EXPLOSER OU COULER.
NE PAS CONNECTER
UNOPIEDIMENT, CHARGER NI JETER AU
FUEGO. LA PILA PUEDE EXPLOSTAR O GOTAR.

MINI MAGLITE LED

MAG-LED™ Technology

2 AA cell flashlight uses **3 WATT LED**

MAG-LED™ Technology

A Powerful Focusing Beam for better night visibility.

Balanced Optics™, creating a highly refined beam with a precise LED in a better optical lens.

Intelligent Energy Source Management (power saving) featuring LED light source with efficient power output.

LED technology emits better light.

Two knowledge projections of its overall performance over the life of the device.

Balanced Optics™, an intelligent optical technology and revolutionary LED, are revolutionary optical technology.

Intelligent Energy Source Management (power saving) and overall technical design is included in efficient management.

The LED technology output is better than the others.

The balanced beam provides an extra wide range of light for the life of the device.

Balanced Optics™, an overall optical technology of an LED in a better optical lens.

Intelligent Energy Source Management (power saving) and overall technical design is included in efficient management.

The LED technology output is better than the others.

The balanced beam provides an extra wide range of light for the life of the device.

LED

MAG-LEED™ Technology

A Powerful Projecting Beam that focuses simply by rotating the head.

Balanced Optics™, combining a highly refined reflector with a quality LED, for a balanced adjustable beam.

Intelligent Energy Source Management (patent pending) balances high brightness with efficient power usage.

LED technology extends battery life.

Even brighter projecting beam for emergency illumination with the flip of a switch.

Balanced Optics™, our proprietary reflector combination that sets MagLITE-LED apart from other rechargeable, rechargeable flashlights.
